

**Newly released P-100 mono power amplifier  
with magnesium body  
The P-100 rikyū with beautiful new “Sabi-Rikyū” finish  
Original rusty-brown finish based on traditional Japanese coloring**

Bewith, Ltd. New Product Announcement January 7, 2020

Bewith, Ltd. (Headquarters: Tosu, Saga Prefecture; President: Toshiharu Nakashima) announces the release of a color variation model of the compact P-100 mono power amplifier—the new P-100 rikyū—which adopts audio equipment-specific MAGNEOLA magnesium alloy for the body, and features an original “Sabi-Rikyū” finish, based on traditional Japanese coloring. The model will be released at BEWITH product dealers nationwide.

P-100 rikyū Monaural Power Amplifier

### **P-100 rikyu New Product Overview**

The P-100 rikyu is a color variation model of the P-100 series, a compact, high-performance power amplifier that realizes the concept of "one channel, one amp" and "one amp, one speaker." The stylish exterior features an original "Sabi-Rikyu" finish, based on traditional Japanese coloring. With this model, we've now unified it with the new PLUG&PLAY product coloring theme, making it perfect for upgrading your system with the PLUG&PLAY DSP controller. Naturally, the new model employs the same Bewith BSZ1 acoustic-only op amplifier, famous from the P-1R and P-100R models, and features a lightweight, highly rigid body constructed of audio equipment-specific MAGNEOLA magnesium alloy. It also boasts superior basic design and sound quality specifications, such as discrete amplifier circuits made in the tradition of the Air Circuit concept and custom-made power transformers with a low core loss magnetic core and high purity oxygen-free copper windings, common to all models of the P-100 series.

### **P-100 rikyu Main Features**

1. Original "Sabi-Rikyu" finish based on traditional Japanese colors.
2. All-magnesium body with unique acoustic magnesium alloy MAGNEOLA.
3. Features the BSZ1, an original acoustic-only op amp jointly developed with New Japan Radio Co., Ltd., installed to the driver stage.
4. Discrete amplifier circuit with rated output of 75W (20Hz-20kHz, 0.03% THD).
5. Custom-made power transformer with low core loss magnetic core and high-purity oxygen-free copper windings.
6. Lightweight, compact design with a body width of 187mm (excluding terminals) and a weight of 497g.
